To H. H. the Maharaja of Mysore.

Some humble feelings to your kind notice:-

Dear Sir,

we thought of great helpening done to our country by Countrymen of Mysore by one of our own countrymen becoming the Dewan of Mysore. But instead of help we are receiving trouble by the two foreign Officers appointed by him. There two are in the mouth of every body throughout the Country. There are Messers: Seneratti and Mayluraganam. The latter came to this state only fourteen years ago. He was risen to his high state too soon by his ability of bribing higher authorities and in addition to this he has driven out his home wife and child and has assumed another low-born woman as his concubine. By this second Caste no of this high family woman are spoiled. when he was in his low position he used to fleece the people for money and if you want this information you can obtain his character in the towns of Tuticorin and Devangarai. You can very well gather the information by Dr. Arumugam Modaliar. Mr Mayluraman has in his keeping some Mangalore girls and they are more dear to him than nobleness. Therefore I think things will be brought to some settlement by appointing an officer ~~of ability to Mysore people~~ of amiable qualities to supervise both offices and their work. And I think it in a way better to appoint an European Officer to the head of the medical department as soon as possible if the fame of Mysore is to continue in future. This man addition to all these recommends only the applicants chosen by his illegal wife who is a vicious element to the whole state. This low born woman goes about with her para mour in his car, even and attends the Hospital with him and exercises her power over whole staff of the Victoria hospital. They are made afraid of this team of him. He has kept his illegal son born of her to tend while his own natural Son is working in a workshop under a small pay. I think I am not attending you in any way by giving out my humble feelings to you and hope for the appointment of a Superior officer to clean all these mischivious elements out of the State.
